

How To Promote Your Music On YouTube & Twitter On Complete Autopilot

Paschalis I. MusicProductionTips.net

Welcome to our post: How to promote your music on youtube & twitter on Complete Autopilot.

Method

In this method, we're going to talk about driving traffic / views to your YouTube channel and twitter account automatically, without lifting your finger. Once it's setup, you then forget about it and it works by itself on **complete autopilot**.

Have you been one of those guys who upload a video or track then end up doing nothing other than logging in and *hoping* to get views or get viral out of nowhere? I've been there, and I can feel how it's like to know you've uploaded some really great content only to be the only one enjoying it. **It sucks**.

So this method is really simple. This is the same method I've been following for some weeks now and as you can see on your left of your screen [on the live version](#) it's truly working – *bottom right if you're reading on a smartphone* – judging by the number of shares and the zero effort of mine, other than just setting this up in literally 5 minutes.

What we need to do is to **1. Find engaging people (don't worry you won't have to do anything manually)** **2. Who are Interested in your genre** **3. And make them follow you** – it's not as hard as it sounds and *you'll make no effort whatsoever*. There's nothing better than finding people who literally love ___ *insert your genre here* ___ and keep them as your followers forever.

I know that it might sound too good to be true to your ears, but if you give me only **one** chance to show you that this is the real deal, then I am sure you'll thank me later 😊 So, how do we gain followers on complete autopilot?

Its really simple. You need to find people who:

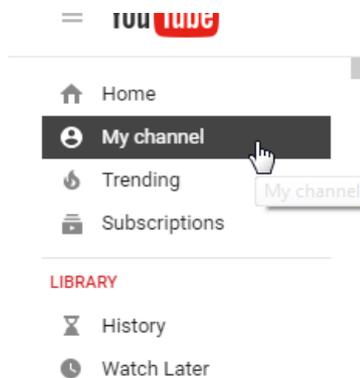

1. Love being engaged in social media.
2. Are 100% sure interested in your craft.
3. And also make sure to not lift a finger, so that you'll be able to invest your time in producing music – *or drinking beers who am I to judge*– rather than spending your valuable time in self promotion.

This is the perfect dream, isn't it?

But it ain't got to be a dream anymore, since I'll show you step by step how to do it, right now.

Step 1. Get Your YouTube Profile Link

This is the easiest thing to do. Just click on **My Channel**.

Grab your profile link from the URL area, it should be similar to mine: www.youtube.com/channel/UCYAx3aHx3i6oFSLZkMKduxQ

It might even have a better looking name in its last part, but worry not since it's working perfectly either way.

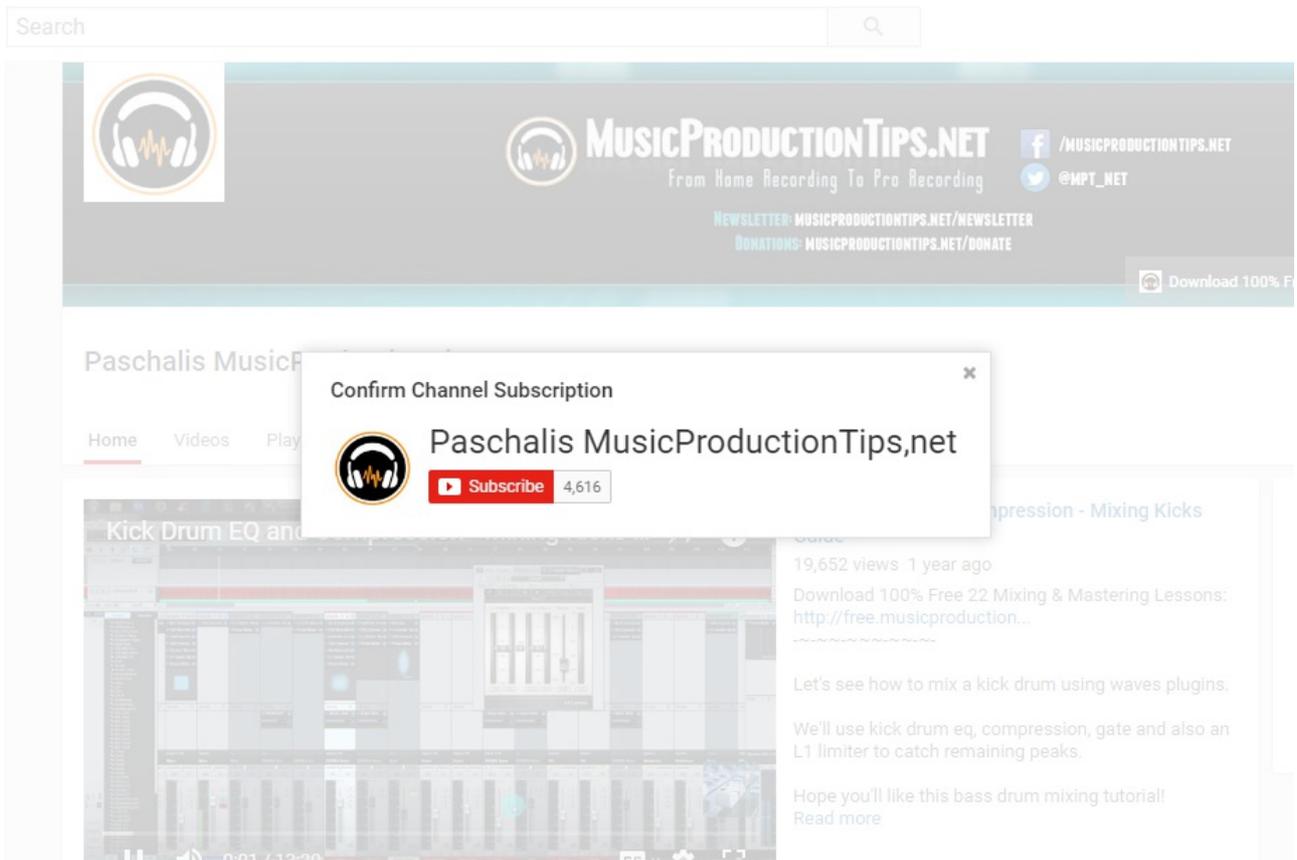

Step 2. Add Your Subscription Pop Up

At the end of your link add this: **?sub_confirmation=1**

For example, my youtube profile link should now look like this: www.youtube.com/channel/UCYAx3aHx3i6oFSLZkMKduxQ?sub_confirmation=1

This adds a really nice popup when someone visits your YouTube profile page which increases the subscription ratio by a mile. If someone is already subscribed to your channel it's not gonna show up which is awesome.

Here's an example of how it looks like:

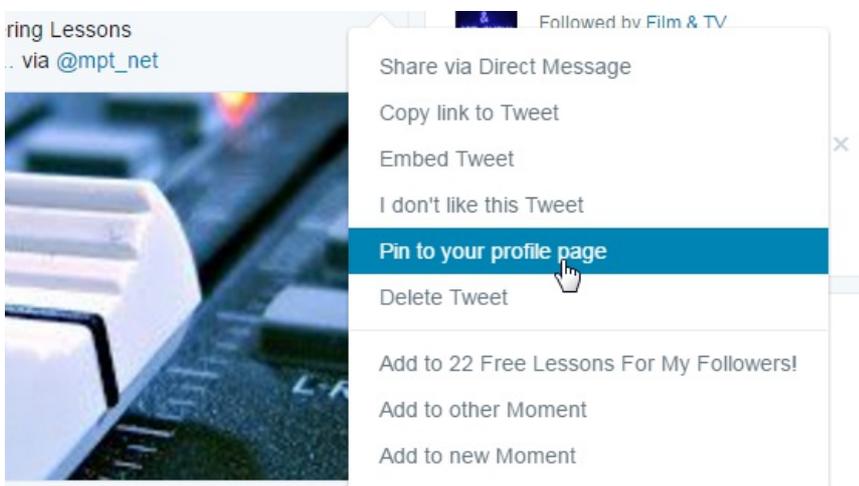

Step 3. Tweet The Link And Pin It

Tweet the link that we just created on step 2 above and **pin it**.

Say whatever you wish, but make sure to use the link we just created above, since it **makes a huge difference** as we said above.

Here's an example of what to say: Follow me on my official youtube channel here! (insert the link we've just created). Also add an image to your tweet for some eye candy.

Then pin your tweet to the top.

Step 4. Understanding The Strategy

Now we're ready to promote ourselves. But before we do that, let's see the strategy that we'll follow. As we've said, we need to find people who are proven to be active on social media and interested in our genre.

For this example, I'll pretend to be a rapper who wants to promote his music, but this works for all the genres and everything that you can imagine. It even works for non-music projects, so allow your mind to pop some ideas.

How can we find both active and targeted audience, you may ask?

We can only do this by implementing these 2 simple techniques below.

- **Engage with the followers of your competitors.**

What's a competitor? A competitor is someone who's got a group of followers in a specific "category" similar to yours. Since, for this example, I am a rapper, I'd like to find people who are interested in rap music, of course. By engaging with the fans of my rap competitors I am 100% sure that I won't waste my time with people who are not interested in my music.

In short: If someone is following a rapper, then he loves rap. Simple.

- **Engage with the *active* followers of your competitors.**

Not only this is the best way on how to promote your music on youtube and twitter at the same time, finding ultra-targeted audience, but I'll also show you how you can make sure that this audience is active on twitter too. Just because someone likes rap, does not mean he's engaged on Social Media. You don't want to engage with inactive twitter or youtube accounts which users abandoned.

You want **1. Ultra Targeted People** and at the same time **2. Active people**. We can do this by not only engaging with the followers of your competitors, but also engage with the *re-tweeters* of your competitors (people who re-tweet the posts of your competitors). This is a huge footprint that *not only they love rap, but they also love being active on rap related social media. Bingo. 😊*

- **Engage with people based on your hashtag.**

This is really powerful since you can engage with people found in a hashtag such as #rap #dnb #rock #eminem (etc.). Can you imagine the possibilities and the power behind this technique?

Enough with the theory, it's time to set it up and see how these ideas work in real time.

Step 5. Implementing The Strategy With Step-By-Step Images

As I've mentioned, you won't need to spend any time of your life to do any promotion, except these 5 minutes for this setup.

Now, let's set up the system which will take care of your promotion on autopilot.

I highly recommend you to follow the steps with me now, let's begin.

a) Click the image below

 Connect Your Twitter **Right Now** and Watch It Grow Automatically

b) Connect your account

Authorize Valet Social to use your account?

[Terms and Conditions](#)

c) Set Up Your Competitors

Competitors | Tweet Activity

In order for our team to target the right audience, we need you to identify some accounts with similar content. The more you add, the more we'll test and optimize. [Learn More](#)

Screen Name

Here add a couple of competitors. Let's say that my music is influenced by Linkin Park, so I want people who like Linkin Park.

Feel free to add your **own** influences / competitors. Allow me to show you how I add Linkin Park, for this example, so that you can go ahead and do the same for your own genre.

d) Click the **Discover** button

Keyword:

Search 

| Screen Name | Followers | Following | Last Tweet | Tweets | |
|-----------------|-----------|-----------|---------------------|--------|---|
| linkinpark | 5231964 | 124 | 2017-06-04 02:37 PM | 5894 |  |
| LinkinParkMX | 7478 | 177 | 2017-06-04 03:04 PM | 13111 |  |
| linkinparkpl | 1326 | 93 | 2017-06-04 03:17 PM | 2345 |  |
| LinkinParkPeru | 5565 | 169 | 2017-06-04 04:10 PM | 8344 |  |
| lpchileofficial | 502 | 57 | 2017-05-29 01:03 PM | 390 |  |
| lpindiau | 885 | 100 | 2017-06-04 08:57 AM | 4667 |  |
| LPLive | 44146 | 122 | 2017-06-04 12:57 PM | 12096 |  |
| LPFItwit | 18196 | 571 | 2017-06-04 08:26 AM | 12492 |  |

Click to enlarge

As you can see, there are many accounts with the words “Linkin Park” in them. Obviously, we want to target the followers of the official twitter of Linkin Park, which is the first one with the 5.231.964 followers.

The other twitter accounts must be fan pages. **Do not underestimate the fan pages. If someone followed a fan page of their favorite artist, this is a huge indication that they might be even more active on Twitter and crazier about the same genre of music as you’ve got to offer.**

So, for this example, I would add the official Linkin Park account, LPLive with 44.146 followers and maybe LPFItwit with 18.196 followers **by hitting the blue icon**.

You can do the same for more artists.

I usually add 2-3 competitors (their official accounts) along with a couple of their fan pages. I follow a total of 4 to 8 twitter accounts MAX to speak the truth, since we should prefer quality over quantity here. The more targeted the followers, the better.

e) Click the **Tweet Activity** button

Competitors **Tweet Activity**

Set search criteria for Valet to use to discover accounts tweeting about things related to your account. [Learn More](#)

Add Search

Query

Save

This is powerful. You can engage with people that have searched and taken action in a specific #hashtag.

For my example, I could easily target people who follow the tag **#linkinpark #rock #poprock** and anything that matches your purpose.

When done, click **Save**.

f) Increase Limits

Your daily limits are **10** follows per day and **20** unfollows per day. This is the max number of people our team will follow and unfollow each day on your behalf. Would you like to [increase these limits?](#)

Did you notice that it also says **Unfollows**? This is awesome since the system will **remove people that won't follow you back without you doing anything**.

With **10** follows per day you'll connect with $10 \times 30 = 300$ people per month.

I highly recommend you to increase the limits at **200** follows per day as I've done, since $200 \times 30 = 6.000$ targeted people per month are going to make you popular really faster than just 300 people per month.

Step 6. Sit Back & Relax

Congratulations, you've finished setting up everything. It was *that* easy.

You can now enjoy your life while leaving your music promotion taking care of itself on complete autopilot.

Let's recap.

Here's our brand new strategy:

Our Strategy

This is the order in which we will prioritize our tools with your competitors.

1. **Tweet Search** matching # [redacted] due to being a new query and needing to analyze results.
2. **Copy Followers** from @ [redacted] due to being a new competitor and needing to analyze results.
3. **Follow Retweeters** from @ [redacted] due to being a new competitor and needing to analyze results.
4. **Copy Followers** from @ [redacted] due to being a new competitor and needing to analyze results.
5. **Follow Retweeters** from @ [redacted] due to being a new competitor and needing to analyze results.
6. **Copy Followers** from @ [redacted] due to a follow back rate of 0.00%.
7. **Follow Retweeters** from @ [redacted] due to a follow back rate of 0.00%.

Every day we will periodically, throughout the day, follow people based on our above strategy. We will also unfollow your non-followers (people that haven't followed you back within 4 days) and unfollowers (people that used to follow you but no longer do).

Final Words

This is it! Nothing else to do here, just leave the system do the hard work while you enjoy your life.

If you want faster results I highly recommend you to [increase your sending limits](#). It's definitely better to engage with 6.000 people per month than with just 300 people per month.

Feel free to share this guide with your friends or even download a completely Free PDF version for you to read *on all your mobile devices*.

I've granted you the rights to share the PDF version too, without having to buy the guide or even pay me for any license for copyrights. Sharing is caring.

I hope you enjoyed this. If you'd like to show some appreciation for my work, you may [follow me on Patreon](#).
